NYS Volunteer Fire Infrastructure & Response Equipment (V-FIRE) Grant Program Award Announcement

The Sennett Fire District and the Sennett Fire Department are excited to announce that we have been awarded \$1,000,000 from the NYS Volunteer Fire Infrastructure & Response Equipment (V-FIRE) Grant Program.

The V-FIRE Grant Program is administered by the New York State Division of Homeland Security and Emergency Services (DHSES) for agencies comprised of volunteer firefighters that provide fire protection and emergency response services to improve their facilities and/or response capabilities through either the construction, renovation or purchase of facilities, or the purchase of new equipment.

This funding will allow us to make needed renovations and improvements to fire station 1 on Turnpike Road, for better safety, improved efficiency, and update spaces to meet current, modern safety & operational standards.

Station 1 has been serving the Sennett Fire Department and our community since 1965, and this grant gives us the opportunity to make some much-needed upgrades to the station by preparing it to continue serving our community for years to come.

The fire district and fire department are appreciative for the opportunity provided, and the support of our community.
